

Chatter and Reminiscing

Great British Car Journey

21 members of Devamog braved the November weather from thick fog to driving rain, 7 Morgan's appeared one by one with a few others in their tin tops.

I personally had a blast driving over the Staffordshire/Derbyshire Moors through the stunning landscape and the quintessential moorland villages, hood down heater on full not the ideal conditions but amazing views as I drove in and out of the fog.

We arrived at the museum early, Ian invited for a very welcome cup of coffee, which was appreciated after our drive.

If you are interested in old cars, your definitely in the right place it's an amazing collection of over 100 British Classic Cars from the humble Austin 7 up to the latest McLaren made more interesting audio and visual guide provided.

There was a lot of chatter and reminiscing about the cars our Dad's owned and how good or bad they were, lot of memories flooding back to everyone who was there, a fully enjoyable day it's my second visit it's definitely not going to be my last!

Thanks to the museum for their warm welcome and organised tour and for everyone who attended.

Thanks to Joe for a few of the photos
